# Manage multi-dimensional relationships Enquire Project Portfolio Management and Impact Reporting software

Understanding impact is more than the activities and outputs of an individual project. You need to track, measure and report on each and every contribution to a program or multiple programs.

With Enquire you can manage your strategic plan, set goals, manage KPIs and milestones. Prioritise and manage funds for every investor with individually targeted reporting without losing sight of the overall outcomes delivered.

Portfolio-Program-Project Hierarchy

Grant programs do not exist in isolation. Understanding impact demands the ability to track how any one project output can contribute to one or more programs and how program results deliver to strategic portfolio goals.

Targeted Stakeholder Management

Funders need reporting that targets what was achieved for their investment. Enquire makes it easy to report on the outcomes achieved, provide visibility on the impact and build confidence that supports future investment.
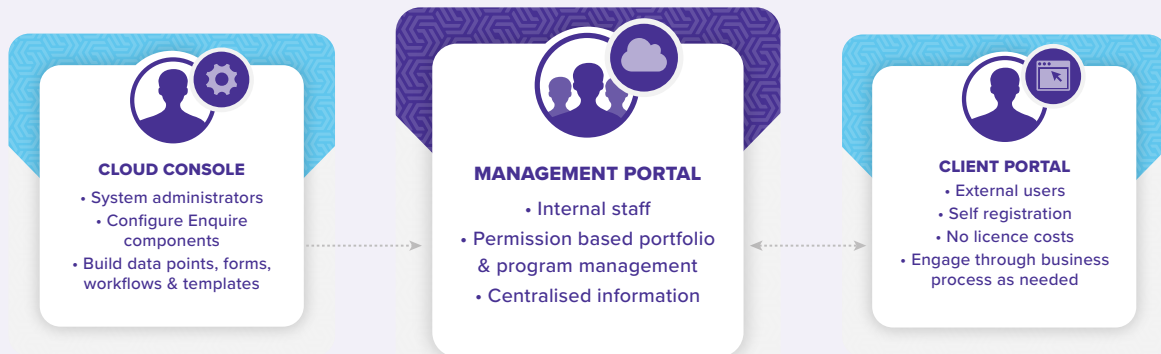

Impact Assessment on Strategic Goals and Plans

Provide full visibility on progress and results with advanced data management to support analytical reporting. Roll up results or filter with ease, track current and historical data to build your impact story.
