

A step by step guide to help you understand the journey to modernising program management.

Every organisation is different, but we all share many challenges. Modernising program management means improving administration, data management, transparency, compliance and reporting. It demands a trusted technology partner and software solution to reduce risks and make your transformation easy.

With Enquire benefit from the features and flexibility to support your needs at every step in your journey.

1

Online Repository

With unified data and a single access point bring visibility, accessibility and engagement on documents, contracts, applications and reports. Create templates, generate documents and manage interactions and collaboration.

2

Automated Alerts & Reports

Never miss an important date. Proactively manage your obligations and engagements. Improve reporting, renewals, payment schedules and funder management with automated notifications to keep everything running smoothly.

3

Lifecycle Process Online

Streamline your administration with workflows and online processes to eliminate double handling, paper-based processes and manual work-arounds. Benefit from “at a glance” visibility on every aspect of your program.

4

Systems Integrations

Power real-time data management and organisation-wide efficiency with integrations to critical business, financial and HR systems. All systems benefit from a single point of truth with easy accessibility when and where needed.

5

A.I. & Analytics

Inform decision-making, manage risks and understand impact for your programs with business intelligence services. Drive organisation-wide improvements and benefit from analytical insights.
