

### Configurable workflows for flexible business processes

#### What are workflows?

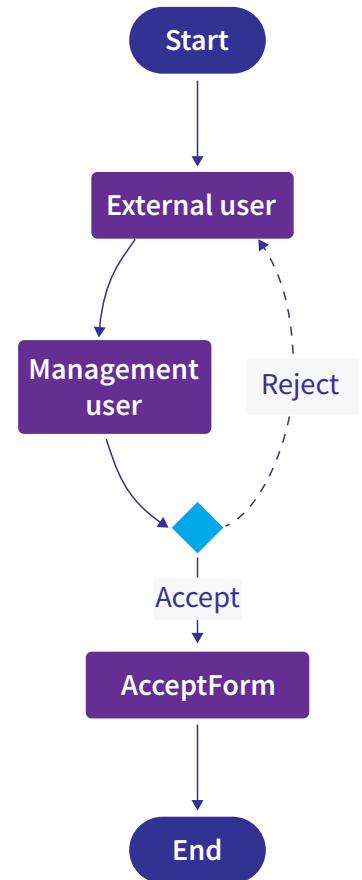

Enquire's workflows are a powerful and flexible tool to digitise your business processes across the funding and outcome reporting lifecycle. With options to automate, bulk action and schedule processes, workflows streamline tasks and enable greater collaboration in every project.

#### Next Gen workflows

Next Gen workflows upgrade these processes with the addition of internal and external comments for improved collaboration and stakeholder engagement, document management enhancements and a greater degree of auditability.

#### How they work

Enquire simplifies the digitisation of complex business processes using configurable forms, user roles, and steps. Supported by emails and alerts, status updates and logic steps to accept, reject or request amendments to external submissions.

### How our clients use workflows

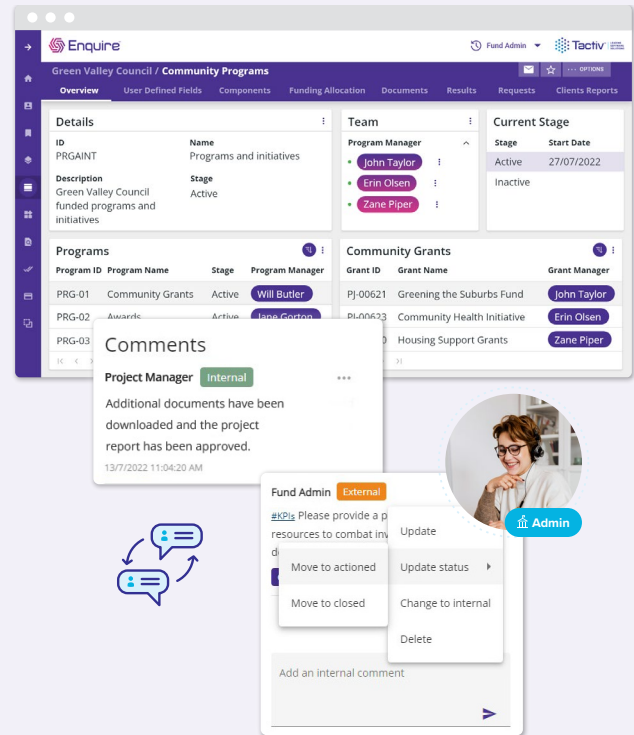

**Try Next Gen workflows today for free**

### Full lifecycle management software

Enquire connects your organisation with individuals, groups and organisations in a **user centric** approach providing a:

- digitally-enabled
- responsive
- easy to use
- accessible online system
- with bilingual forms

that links funding, investments and program objectives to outcomes.

### The Next Gen workflow advantage

#### Workflows mapped to your unique processes

Enquire allows you to exercise complete control over your grant business processes, with flexible configuration.

#### Keeping teams focused and on mission

Integrated with in-system notifications and alerts, comments, and tags, Enquire's workflows make collaboration easy and auditable.

#### Eliminate ambiguity in your grant audits

Data capture is automatic, with time stamps and audit logs mapped to user-based roles that ensure accountability.
