

Making the Switch: Adopting New Grant Software

With digitisation in grant and program management on the rise, organisations are turning from offline and outdated systems, such as paper forms and Excel, to software as a service (SaaS) solutions for greater efficiency, more reliable data and better outcomes. Are you ready to make the switch? Let us take you through it.

Enquire as a grant management solution

Excel spreadsheet software can be used to manage and track grants, but it's not specifically designed for this purpose which leaves the process with vulnerabilities. Paper-based forms, Excel or other spreadsheet systems have limited capacity for storing and organising large amounts of data, lack purpose-built grant collaboration and engagement features, have inefficient reporting capabilities and run the risk of data entry errors.

	<ul style="list-style-type: none"> • Excessive time spent on accessing and verifying data • Disparate information storage limits collaboration and reporting • Risk of errors due to multiple entry points 	VS	<ul style="list-style-type: none"> • One central location for efficient data organisation • Collaborative online document and process management • Fully auditable processes and reporting capabilities

Purpose-built Grant Management

Purpose-built grant systems have advanced rapidly to provide solutions to a range of challenges.

<p>Best Practice</p> <p>Online grant systems apply best practice processes for end-to-end grant management, saving time and increasing efficiency.</p>	<p>Effectiveness</p> <p>A system that integrates the full lifecycle of grant management from application to reporting saves time and increases effectiveness.</p>	<p>Data Integrity & Reporting</p> <p>Grant systems store all data in one place for reliable and accessible data and built-in reporting capabilities allow for rich insights.</p>
<p>Flexibility</p> <p>Effective grant systems provide flexibility to meet complex and dynamic organisational needs, at any time.</p>	<p>Configurability</p> <p>Advanced grant systems like Enquire offer deep configurability in business processes, using e-forms, templates and workflows.</p>	<p>Integration</p> <p>Integration of grant systems with common systems is crucial to streamline the end-to-end process for impactful grant management.</p>

Implementing Enquire

Adopting a new business system can feel like an overwhelming task - but our guided approach provides structure and takes the stress away. Our successful implementation methodology is efficient and adaptable to ensure a smooth software adoption. We can break our process down into 6 easy steps.

1. Analyse & Collaborate

Work with analysts through workshops to map your specific requirements.

2. Communicate & Transform

Review the mapped processes and engage stakeholders to gain internal support for Enquire's implementation.

3. Design & Interact

Our analysts undertake design work to ensure your requirements are clearly met.

4. Develop & Test

Development work is delivered fully tested by our test and quality assurance team.

5. Implement

Start the deployment of the system with data migration and user setup.

6. Training & Change

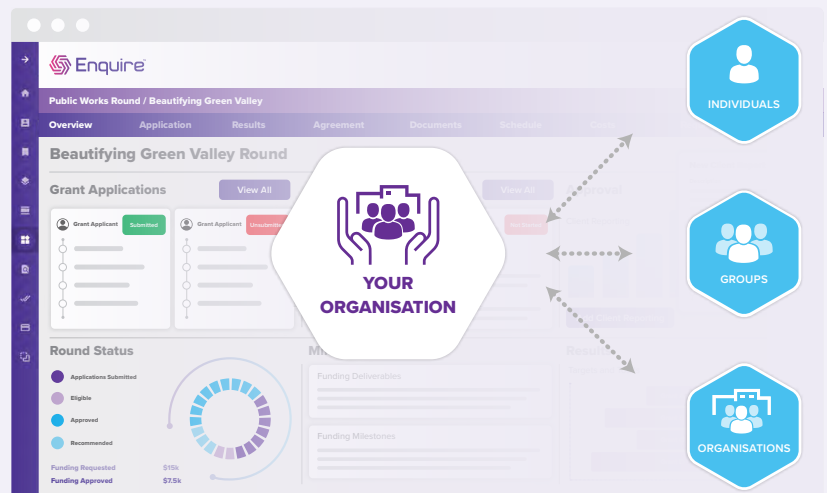

Utilise specialised training and change management services and access ongoing support.

Full lifecycle management software

Enquire connects your organisation with individuals, groups and organisations in a **user centric** approach providing a:

- digitally-enabled
- responsive
- easy to use
- accessible online system
- with bilingual forms

that links funding, investments and program objectives to outcomes.
